

All three Atmel CryptoAuthentication module are pin compatible, and can be placed:

- * ATSHA256A: Client/Host authentication IC with EEPROM
- * ATAES132A: Crypto element device running AES with hardware-based key storage and 32Kb EEPROM
- * ATECC508A: Elliptic Curve (ECC) asymmetric crypto element with ECDH, ECDSA, and hardware key storage

Based on Cryptotronix's version of the original Hashlet
